

HANDS-ON 5 [Intermediate] Reactive Forms — FormBuilder, FormGroup, FormArray & Custom Validators

The screenshot shows a web browser window with the URL `localhost:4200/enroll-reactive`. The page is titled "Student Course Portal" and has a navigation bar with links for Home, Courses, Profile, Enroll, and an "Enroll (Reactive)" button. The main form contains the following fields:

- Student Email:** A text input field with the value `name@university.edu`.
- Course ID:** A text input field with the value `e.g. CS101 or XX101`.
- Preferred Semester:** A dropdown menu with the value `Odd`.
- Additional Courses:** A section with a "+ Add Another Course" link and two input fields. The first field contains `Angular` and the second contains `Java`. Each field has a red "X" icon to its right.
- Agreement:** A checkbox labeled "I agree to the enrollment terms and academic policy." which is checked.
- Buttons:** "Submit Request" and "Reset Form".

The screenshot shows the same web browser window, but the form now displays validation errors. The fields and their states are:

- Student Name:** A text input field with the value `Alex Mercer`.
- Student Email:** A text input field with the value `test@example.com`. It has a red border and a red error message below it: `⚠ Email is already taken.`
- Course ID:** A text input field with the value `101`.
- Preferred Semester:** A dropdown menu with the value `Odd`.
- Additional Courses:** A section with a "+ Add Another Course" link. There are no input fields visible in this section.
- Agreement:** A checkbox labeled "I agree to the enrollment terms and academic policy." which is unchecked.
- Buttons:** "Submit Request" and "Reset Form".
